iBurst Overview

- 1. What do I need?**
A PC or Notebook (PIII, Win 2000 or later, Mac OS X)
- 2. Do I need a phone line?**
No
- 3. I have more than one PC?**
You can link more than one PC on a network (Broadband router (PPPoE) – wired or WiFi)
- 4. Do I need to get my own e-mail address?**
No – iBurst will be your ISP and your e-mail account is included in your monthly sub's
- 5. What happens when I reach my cap?**
Your speed will be reduced to 64Kbps (ISDN speed) – You will not be disconnected. You will only be disconnected if you are on the iGo Lite (210MB) and iGo (500MB) packages – but you have the option to buy more bandwidth.
- 6. Do I have to sign a contract?**
No, you can purchase the modem upfront and use it on a 30 day notice account.

The client needs an iBurst modem to use the iBurst network. This modem is available at Computer Corporation stores nationwide. The client then also need to sign-up for a monthly subscription (that will supply them with a username and bandwidth) – online at Computer Corporation Stores.

1. 30 day account – buy modem upfront and sign a month-to-month contract

2. Contract (12 / 24 / 36 months) – modem included in monthly sub's. No upfront hardware purchase
